# Agenda

Organizational Challenges

Discussion – Remote workforce risks

What can Internal Audit do in the new world?

# The World Has Changed...

Employee challenges

IS/IT challenges

Leadership challenges

Client/Customer challenges

# Discussion: Remote Workforce Risks

- ❑ What are some of the things that IS and IT departments have done on short notice that could have put their organizations at higher risk of cyber attacks?
- ❑ What are companies doing to make sure they haven't introduced cyber risk to their organization?
- ❑ What are some of the things you recommend companies communicate to their employees as they get used to the new normal of remote access?
- ❑ How have attackers responded to the pandemic? How have the threats evolved?
- ❑ Are more companies experiencing breaches? What can I do to properly prepare for a potential breach?

# Discussion: Additional Discussion Items

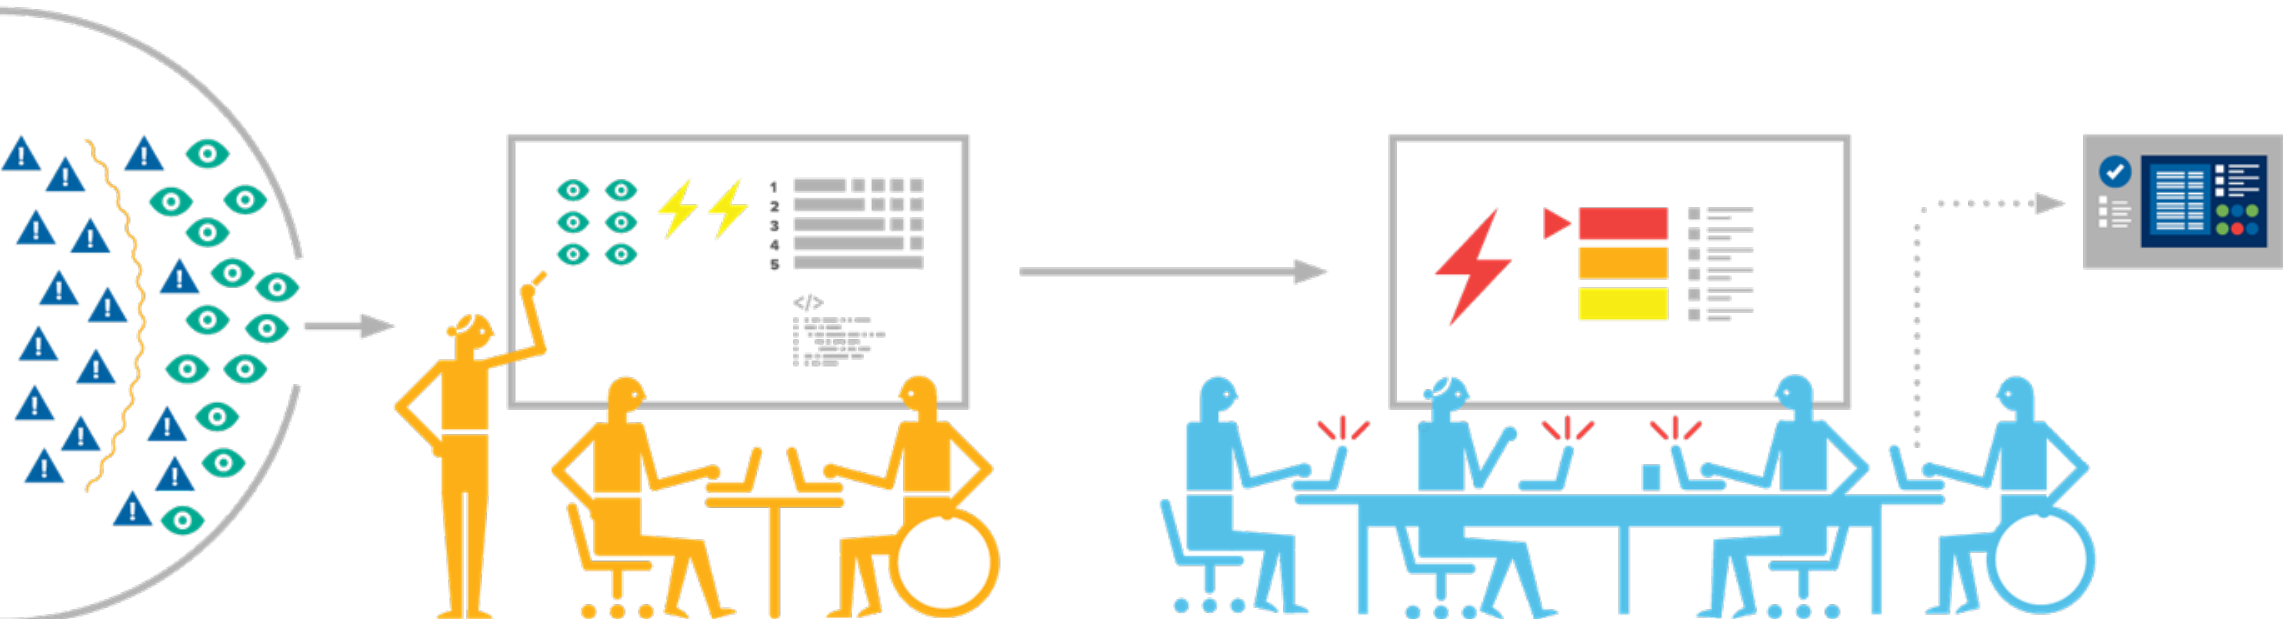

- What are some of the things that Internal Audit should be doing given the new world?
- Remote workforce is unique for each company. How does this affect scoping?
- What are some of the areas that I need to be reviewing during an audit?
- Many companies have implemented online collaboration tools, can these impact security?
- When it comes to securing the home networks, what are some of the things end users should better understand to be more secure?
  - Password security?
  - Wireless networking and home devices?
